# Special instructions for Sporttraxx Timekeeper

A special ON/OFF button has been added to the clock in order to totally isolate the internal battery.   It is used for long term storage and shipping on airways.

Once the button is in OFF position, the clock, the modem and the beam Led will not work.

Attention:  turning off the clock with this button is cancelling the synchronization of the rally time, and the clock needs to be synchronized again, either manually, via computer or via a master clock.

## Synchronization
